SKILLS

Html, Css, JavaScript, ReactJS, Redux, Firebase, Sass, Python, Algorithms, Data Structures, Heroku, Netlify, Socket.io, Postman, Git, Github, Jira, SQL, Excel, Data Cleaning, Tableau, PowerBi

RELEVANT COURSEWORK

Data Structures and Algorithms, Object Oriented Programming (C++), Database Management (SQL), Advanced Applications (React, API, Django), Intro to APIs (.NET, C#), Web Development (React, HTML, CSS, JavaScript), Digital Product Dev (Figma)

EDUCATION

Hunter College Current
B.A Computer Science 2024

PROFESSIONAL EXPERIENCE

Eulerity

Front-end Engineer

New York, NY

May 2023 to Current

- Actively participated in **daily standup meetings** and **weekly scrum sessions** for enhanced collaboration and project alignment.
- Collaborated with cross-functional teams to develop and deploy user-centric features.
- Prioritized **software quality assurance** and **debugging** for a polished final product.
- Streamlined **agile development** by managing project workflows, tasks, and issues in **Jira**.
- Stayed updated on industry trends and emerging technologies through continuous learning.
- Led the implementation of a **React feature**, enabling franchise managers to monitor **user activity logs** for enhanced transparency and efficiency.
- Utilized **React**, **Redux**, and initiated codebase migration to **TypeScript**.
- Ensure **mobile responsiveness** for a **user-friendly experience**.

PROJECTS

Aria

Mar. 2023

Github · Youtube

- Developed an innovative YouTube sharing app that enables simultaneous viewing and fosters a collaborative environment.
- Used Socket io to enable efficient and real-time communication between users and server, enhancing user experience.
- Integrated Firebase for secure and efficient user authentication, improving the sign-up and login experience.

Crwn-Clothing

Feb. 2023

Github

- Developed an e-commerce platform using React, Firebase authentication for seamless sign up/sign in with Google, and useContext for streamlined content management.
- Implemented an intuitive shopping cart feature that allows users to easily add and remove items, adjust quantities, and view their order summary.

Codenames

Dec. 2021

Github

- Launched the development of a sophisticated full-stack web application replicating the game CodeNames, leveraging React and Django to achieve seamless unidirectional data flow and streamlined configuration management.
- Harnessed Django Channels framework for real-time communication and interactive features, fostering user engagement and collaboration.
