FRAMEWORKS AND LIBRARIES: ReactJS, Redux, Sass, Socket.io

TOOLS: GitHub, Git, Jira, Figma, Firebase, Heroku, Netlify, Postman

EMPLOYMENT

Eulerity, *Front-end Engineer*, New York, NY

May 2023 - Dec. 2023

- Collaborated with cross-functional teams to rapidly develop and implement a new feature.
- Developed a React feature enabling franchise managers to monitor real-time user activity logs, enhancing transparency and facilitating data-driven decisions.
- Actively participated in daily standup meetings and weekly scrum sessions for enhanced collaboration and project alignment.
- Streamlined agile development by managing project workflows, tasks, and issues in Jira.
- Prioritized software quality assurance and debugging for a polished final product.
- Transform Figma designs into functional code.

PROJECTS

Aria

Mar. 2023

Github · Youtube

- Developed an innovative YouTube sharing app that enables simultaneous viewing and fosters a collaborative environment.
- Utilized Socket.IO to enable efficient and real-time communication between users and server, enhancing user experience.
- Integrated Firebase for secure and efficient user authentication, improving the sign-up and login experience.

Crwn-Clothing

Feb. 2023

Github

- Developed an e-commerce platform using React, Firebase authentication for seamless sign up/sign in with Google, and useContext for streamlined content management.
- Implemented an intuitive shopping cart feature that allows users to easily add and remove items, adjust quantities, and view their order summary

Codenames

Dec. 2021

Github

- Launched the development of a full-stack web application replicating the game CodeNames, leveraging React and Django to achieve seamless unidirectional data flow and streamlined configuration management.
- Harnessed Django Channels framework for real-time communication and interactive features, fostering user engagement and collaboration.
