Data Structures and Algorithms,
Object Oriented Programming
(C++), Database Management (SQL),
Advanced Applications (React, API,
Django), Intro to APIs (.NET, C#),
Web Development (React, HTML,
CSS, JavaScript), Digital Product
Dev (Figma)

PROFESSIONAL EXPERIENCE

Eulerity

Front-end Engineer

New York, NY

May 2023 to Current

- Actively participate in daily standup meetings and weekly scrum sessions to foster collaboration and ensure project alignment.
- Collaborate with cross-functional teams to develop and implement new features that meet user requirements and provide a competitive advantage.
- Place a strong emphasis on software quality assurance and debugging to deliver a polished and reliable product.
- Stay updated with industry trends and emerging technologies through continuous learning.
- Continuous learning to stay updated with industry trends and emerging technologies.
- Efficiently manage project workflows, tasks, and issues using Jira for agile development, contributing to a streamlined development process.
- Implemented a feature enabling franchise managers to access and review activity logs among users, enhancing operational transparency and efficiency.

PROJECTS

Aria

Mar. 2023

Github · Youtube

- Developed an innovative YouTube sharing app that enables simultaneous viewing and fosters a collaborative environment.
- Used Socket io to enable efficient and real-time communication between users and server, enhancing user experience.
- Integrated Firebase for secure and efficient user authentication, improving the sign-up and login experience.

Crwn-Clothing

Feb. 2023

Github

- Developed an e-commerce platform using React, Firebase authentication for seamless sign up/sign in with Google, and useContext for streamlined content management.
- Implemented an intuitive shopping cart feature that allows users to easily add and remove items, adjust quantities, and view their order summary.

Codenames

Dec. 2021

Github

- Launched the development of a sophisticated full-stack web application replicating the game CodeNames, leveraging React and Django to achieve seamless unidirectional data flow and streamlined configuration management.
- Harnessed Django Channels framework for real-time communication and interactive features, fostering user engagement and collaboration.
