EDUCATION

Hunter College Current
B.A Computer Science 2024

SKILLS

Html, Css, JavaScript, ReactJS, Redux, Firebase, Sass, Python, Algorithms, Data Structures, Heroku, Netlify, Socket.io, Postman, Git, Github, Jira, SQL, Excel, Data Cleaning, Tableau, PowerBi

RELEVANT COURSEWORK

Data Structures and Algorithms, Object Oriented Programming (C++), Database Management (SQL), Advanced Applications (React, API, Django), Intro to APIs (.NET, C#), Web Development (React, HTML, CSS, JavaScript), Digital Product Dev (Figma)

PROFESSIONAL EXPERIENCE

Eulerity — New York, NY
Front-end Engineer May 2023 to Current

- Actively contribute to daily standup meetings and weekly scrum sessions for effective collaboration and project alignment.
- Collaborate with cross-functional teams to develop and implement user-driven features.
- Prioritize software quality assurance and debugging for a polished product.
- Efficiently manage project workflows, tasks, and issues in Jira for agile development, streamlining processes.
- Stay updated on industry trends and emerging technologies through continuous learning.
- Led the implementation of a feature enabling franchise managers to monitor user activity logs, enhancing transparency and efficiency.
- Utilized React, Redux, and initiated the codebase migration to TypeScript.
- Ensure mobile responsiveness for a user-friendly experience.

PROJECTS

Aria Mar. 2023
Github · Youtube

- Developed an innovative YouTube sharing app that enables simultaneous viewing and fosters a collaborative environment.
- Used Socket io to enable efficient and real-time communication between users and server, enhancing user experience.
- Integrated Firebase for secure and efficient user authentication, improving the sign-up and login experience.

Crwn-Clothing Feb. 2023
Github

- Developed an e-commerce platform using React, Firebase authentication for seamless sign up/sign in with Google, and useContext for streamlined content management.
- Implemented an intuitive shopping cart feature that allows users to easily add and remove items, adjust quantities, and view their order summary.

Codenames Dec. 2021
Github

- Launched the development of a sophisticated full-stack web application replicating the game CodeNames, leveraging React and Django to achieve seamless unidirectional data flow and streamlined configuration management.
- Harnessed Django Channels framework for real-time communication and interactive features, fostering user engagement and collaboration.
